There are three different ways to connect the bulb after it has been powered on.

a) Wi-Fi mode: This mode needs to register and login after completing 1 to 1 Mode(Please refer to the connection mode c).Make sure the bulb power on and never been set, you can operate as below steps.

1. Click the "+" at the top right corner and click "Connect device to Wi-Fi"

2.Register and login account

3.Connect the device to the router.

Please choose Wi-Fi signal with "LEDnet-xxx" which is from our Wi-Fi led bulb at your Wi-Fi setting and then go back to Magic Home Pro app to choose your own Wi-Fi router and enter password of your Wi-Fi router correctly. It will take a few minutes to connect successfully. (Please note that Wi-Fi signal "LEDnet-xxx" will be hidden if you enter incorrect password of your Wi-Fi router. In this case, you have to mke Wi-Fi led bulb to factory reset by turn on/turn off 4 times, see FAQ)

Web: anern-group.com | Email: group@anern.com | WhatsApp: +86 13570048098

Step 4: Login with your app account

Enter your app account and password to finish the account linking. (Use the Magic Home cloud account you used on step 1). Your lights will be listed on "Home Control" interface.

Step 5: Control your light

Here, you finish all setups. You can now control your lights by issuing voice commands.

Supported Commands:

Say "Ok Google" or "Hey Google", then.. Turn on <light name> Dim <light name> Brighten <light name> Set <light name> to [50%] Dim/Brighten <light name> by [50%] Turn <light name> [color] Turn on/off all the lights Is <light name> on?

Changing colors on your lights

Color Options for Google Home control of your smart device:

Blue	Orange
Crimson	Purple
Cyan	Red
Fuchsia	Salmon
Gold	Sky Blue
Green	Teal
Lavender	Turquoise
Lime	Violet
Magenta	Yellow

Step 1: Create your Magic Home cloud account

In order to control your smart light with the Amazon Echo or control them remotely, you need to create a Magic Home cloud account and sign in.

••••• २ ँ	13:58	-7 % ■ + ද	••••∘ 奈 〈 Back	13:58 Settings	7 %

Remote control

- 1. We have maintained long-term cooperation with the US Ali Cloud Terminal in USA server, which provide our customers with better remote control services.
- 2. When and only when you register and login your account in Magic Home Pro APP, No matter where you are, you still can control your bulb with APP as long as there's WiFi/2G/3G/4G internet for your smart phone.
- 3. Note: After the bulb is bound to home WIFI, it will not display on your WIFI list anymore.

FAQ

1. Why can't my smart phone find Wi-Fi signal of smart bulb?

Please check if the bulb has been connected with router or not, at the same time the Wi-Fi function of phone works properly.

2. Why can't the Wi-Fi bulb connect with router?

Firstly, please ensure to input the correct Wi-Fi password. If the password is correct and the bulb still fails to connect with router, please shut down the bulb and router then turn on router and bulb 30 seconds later. And wait for 2 minutes before you start App. If the problem cannot be solved after above operations, please restore factory defaults.

3. Why doesn't the bulb show in App after choose Wi-Fi signal of the bulb in phone setting?

Please refresh App device list by sliding down on the screen. If still not find the bulb, please try to shut down the function of smart internet selection of your smart phone settings. This is to avoid automatically exit the bulb signal connection because of unavailable network.

4. How to restore the factory setting for the bulbs?

a. Power on the bulb

b. Wait 3-5 seconds and then power off the bulb

c. At the end of the 4th time when you turn on the bulb, it will emit strobe for a few seconds. After that it will become fully bright at which point the reset is complete. Once you have reset the bulb, you should be able to see its WIFI IP "LEDnet*****" again under your mobile device's Wi-Fi_o

5. How to connect the bulb to Wi-Fi network?

a. Run the newest App "Magic Home Pro" and click "+" button on top right corner. b. Register/Login your Magic Home account.

c. Go to your Wi-Fi settings on your mobile device.

d. Find the bulb's SSID "LEDnet*****" and connect to it. (If not found, reset your bulb,

turn on and turn off 4 times)

e. Open Magic Home app and connect device "LEDnet*****" to Wi-Fi network successfully (choose your router and login your password, ensure the router is 2.4GHZ)

6. How to operate the bulb without router?

a. If bulb has been connected to WiFi network , go to App setting->Device Settings->Remote Settings->Remote status: Closed and disabled linked your Magic Home account.

b. If bulb has not been connected or set up before, just directly connect Wi-Fi signal with "LEDnet*****" in your mobile setting (if you can't find "LEDnet*****", please try again after factory reset)

c. Open Magic Home App, will find a bulb device after scanning and directly control it.

Please pay attention when adding device:

- 1. Make sure that the device is powered on and working.
- 2.Ensure that the equipment is in the state of waiting to be connected.
- 3.Make sure the bulb, smart phone & router are closed together.

4. Ensure that internet connection, router and mobile phone are available

- 5.Ensure that you have entered the correct password to your router.
- 6.Make sure the device is connected to the 2.4GHZ Wi-Fi band and is broadcasting. Besides, the router cannot be set to hidden.

7.Make sure that the encryption of router setting is WPA2-PSK and the type of certification is AES or both are set to automatic. Wireless mode can not be 11n only.

8. Make sure that the Wi-Fi name consist of English letters.

_	CMCC	\odot
	Living room 😢	rightarrow ightarrow
	Zengge-Office1	rightarrow ightarrow
	Zengge-Office2	$\mathbf{\hat{\mathbf{r}}}$ $(\mathbf{\hat{\mathbf{r}}})$
_	Zengge-Office3	$\hat{\mathbf{r}}$ $>$

9.If the router accesses devices number reach the limit, try to shut down the Wi-Fi function of some devices and clear the channel in order to reconfigure.

10.If the router opens wireless MAC address filter, try to remove the device out of router MAC filter list and make sure the router does not forbidden networking of device.

ATTENTIONS

- 1. Please use the product in a dry environment.
- 2.Make sure the bulb power off before installing and you can power them on after installing.
- 3.Please don't touch the bulbs when your hands are wet to avoid electric shock.
